SUMMARY

Software Engineer with 4+ years of experience in full-stack development (TypeScript, Node.js, AWS). Skilled at optimizing performance and leading cross-functional teams to deliver robust, scalable solutions on time.

EXPERIENCE

Coderhouse
September 2025 - Present
Senior Staff Engineer

Driving technical leadership and full-stack development at Latin America's largest edtech platform with over 500,000 students.

- Architect scalable infrastructure supporting 50,000+ concurrent users during peak demand.
- Lead cross-functional engineering teams and guide product-level technical decisions.
- Design and deliver robust solutions that enhance platform performance and reliability.
- Establish engineering standards and foster a culture of technical excellence.

Mercado Libre
April 2024 - September 2025
Senior Software Engineer

Led the development of microfrontend applications using React and TypeScript, improving modularity and scalability across the platform.

- Spearheaded the implementation of best practices and maintained top-tier coding standards.
- Mentored team members and supported their growth.
- Actively contributed to a high-performing, collaborative engineering culture.

Crombie
April 2023 - April 2024
Technical Leader

Guided cross-functional development teams to build high-quality web applications while fostering a culture of collaboration and innovation.

- Directed development efforts for teams of up to 8 engineers.
- Enhanced application performance through targeted optimizations in code and infrastructure, resulting in faster load times and a better user experience.
- Promoted best engineering practices and continuous improvement across teams.

Crombie
June 2022 - April 2023
Senior Software Engineer

Designed, developed, and maintained web applications, implementing new features and resolving bugs to meet client requirements and enhance product quality.

- Refactored legacy code, significantly reducing production errors.
- Managed CI/CD integration efforts to enhance development workflows.
- Mentored junior developers to support onboarding and team performance.

Crombie
March 2022 - June 2022
Software Engineer

Built web interfaces in collaboration with UX/UI and development teams, enhancing product usability and visual consistency.

- Developed reusable components to streamline development.
- Documented workflows to support maintenance and scaling.
- Helped integrate new tools to modernize the frontend stack.

EDUCATION

Universidad Nacional Del Litoral
Mar 2022 - Present
Bachelor of Computer Engineering

Studying Computer Engineering with a strong foundation in software development, algorithms, and data structures. Gained hands-on experience with Python, C++, MySQL, and Agile methodologies through academic projects.

SKILLS

Technologies
JavaScript
TypeScript
React.js
Next.js
Node.js
Nest.js
Microservices
Microfrontends

Cloud & DevOps
AWS Lambda
AWS API Gateway
AWS EC2
AWS ECS
AWS S3
AWS RDS
AWS ALB
Docker
CI/CD
Monitoring

Databases
PostgreSQL
MongoDB
DynamoDB
Redis
ElasticSearch
Pinecone

Languages
Spanish (Native)
English (Professional)
French (Intermediate)

Methodologies & Practices
Agile/Scrum
Code Review
System Design
Performance Optimization
Mentoring & Leadership
Technical Documentation
